# GET BACK INTO PRODUCTION —FAST & EFFICIENT

Transferring your mould shouldn't be complicated. Millennium Plastics ensures a smooth, risk-free transition with minimal downtime and maximum efficiency. Our expertise in mould transfer means your production stays on track without delays or disruptions.

## FAST & RELIABLE TRANSFERS

Get your moulds up and running with minimal downtime

## COMPREHENSIVE INSPECTION & OPTIMISATION

Ensure peak performance with expert mould analysis

## SEAMLESS TOOL TRIALS & TESTING

Percentage of customers who report being satisfied with the company's offerings

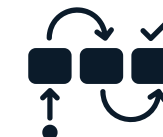

## TRANSPARENT, COMPETITIVE PRICING

No hidden costs—just clear, fair pricing.

## END-TO-END SUPPORT & HANDLING

From transfer to production, we handle it all

# THE MILLENNIUM TOOL TRANSFER PROCESS

*We simplify the process with a clear, structured approach:*

1

## ASSESSMENT: CAN WE HELP?

Before we move forward, let's make sure we're the right fit. We'll check key details like mould size, cavitation, condition, part volumes, resin, and quality needs. A quick chat helps us ensure a smooth transition.

2

## RECEIVING & INSPECTION

We'll coordinate the transfer of your mould to Millennium Plastics. Once it arrives, our team inspects everything and gives you a full report. If any fixes are needed, we'll discuss them before moving ahead.

## TOOL TRIALS: TESTING & TWEAKS

Now it's time to put your mould to work. We'll run trials using your specified resin, make adjustments if needed, and fine-tune until the results are spot on. You review the samples and give us feedback.

3

## PRICING: NO SURPRISES

With all details locked in, we'll provide a clear, accurate quote covering part costs and any additional services.

4

## PRODUCTION: FULL STEAM AHEAD!

Happy with the results? Approve the quote and send us a Purchase Order (PO)—we'll order materials and get production rolling!

5
