

# MILLENNIUM PLASTICS

## Temporary Capability Brochure

This is a temporary website placeholder PDF for development only. Replace it with the final capability brochure before launch.

## Production Focus

Plastic injection moulding built for production-critical components, supported by in-house tooling, CNC insert support, assembly and quality-driven production control.

Capability	Temporary homepage wording
<b>Injection Moulding</b>	Production-ready moulding across 25T-538T machine range.
<b>In-House Toolroom</b>	New mould manufacture, repairs, maintenance, modifications and optimisation.
<b>Tool Transfer</b>	Structured transfer, inspection, trials and recovery support for existing moulds.
<b>CNC / Inserts</b>	Support for turned inserts and engineered components used in hybrid moulded assemblies.
<b>Assembly</b>	Secondary operations, packing and supply-ready delivery.

## Quote Inputs

For accurate quoting, provide drawings, sample photos, material requirements, estimated annual volume, existing mould details, packaging requirements and any current production issue.
